THE JOURNAL OF THE OPTICAL SOCIETY OF AMERICA is the official organ of the Society, and is devoted to original papers on experimental, theoretical and applied optics, in all its branches, including research, instruction, manufacture and design of optical instruments, as well as physiological and medical optics. It is published monthly by the American Institute of Physics Incorporated for, and under the editorial management and control of, the Optical Society of America.

NOTICE FOR CONTRIBUTORS

Manuscripts for publication should be sent to F. K. Richtmyer, Cornell University, Ithaca, New York. Papers are published in English only. To be acceptable for publication manuscript should be original typewritten copy (not carbon copy) either double or triple spaced, with wide margins. References should appear as footnotes only and should be numbered consecutively to avoid repetition. References should include author's name, journal, volume number, page number and year and should be listed in the order given here. Attention should be given to captions for tables and legends for figures. These in all cases should be complete in themselves so as to make the data intelligible to the reader without consulting the text of the article.

Special care should be given to mathematical expressions. The very simplest formulas only should be typewritten and all others carefully written in with pen and ink. Fractional exponents should be used to avoid root signs everywhere. Extra symbols should be used to avoid complicated exponents. The solidus (/) should be used wherever possible for fractions.

All illustrations should accompany manuscript and should always be referred to in the text. Line drawings must be made with India ink on plain white paper or on tracing cloth. Coordinate paper is not desirable, but if used must be blue-lined with all coordinates to be reproduced drawn with India ink. Lettering should be of sufficient size to be legible after reduction.

Proof and all correspondence concerning papers in the process of publication should be addressed to the Editorial Secretary, American Institute of Physics, 11 East 38th Street, New York, New York.

A portion of the cost of publishing the results of research must be regarded as an integral part of the cost of the research. In keeping with the policy which is effective for the Institute's publications a bill for $3.00 per page will be sent to the authors of papers appearing in this journal. It is intended that the authors shall present these bills for payment to the institutions which have supported their researches. If the institution is unable to make payment the bills are to be returned to the Editorial Secretary marked "No funds available." One hundred reprints without covers will be furnished free. If additional reprints are desired that fact should be indicated on the proper blank sent out with galley proof. The price scale is indicated thereon.

SUBSCRIPTIONS

Subscription price: United States and Possessions and Canada—$6.00; Foreign—$6.60. (Remittances from foreign countries must be in U. S. currency, or the equivalent on basis of current rate of exchange.)

Subscriptions, renewals and orders for back numbers should be addressed to Prince and Lemon Streets, Lancaster, Pennsylvania, or to the American Institute of Physics, 11 East 38th Street, New York.

The Journal of the Optical Society of America is published monthly at Prince and Lemon Streets, Lancaster, Pennsylvania.

Entered as second-class matter at the Post Office at Lancaster, Pennsylvania, under the Act of March 3, 1897. Acceptance for mailing at special rate of postage provided for in the Act of February 28, 1925, embodied in paragraph 4, section 412, P. L. and R., authorized June 19, 1925.

THE OPTICAL SOCIETY OF AMERICA

OFFICERS OF THE SOCIETY

W. B. RAYTON, *President*
Bausch & Lomb Optical Company
Rochester, New York

ARTHUR C. HARDY, *Vice President*
Massachusetts Institute of Technology
Cambridge, Massachusetts

L. B. TUCKERMAN, *Secretary*
Bureau of Standards
Washington, D. C.

HENRY F. KURTZ, *Treasurer*
Bausch & Lomb Optical Company
Rochester, New York

The Board of Directors consists of the above officers; the Editor of the Journal; the Past President; and five elected members:

E. C. CRITTENDEN, *Past President*
Bureau of Standards
Washington, D. C.

F. K. RICHTMYER, *Editor*
Cornell University
Ithaca, New York

Elected Members

ARTHUR H. COMPTON
Ryerson Physical Laboratory
University of Chicago
Chicago, Illinois

HERBERT E. IVES
463 West Street
New York, New York

CARL W. KEUFFEL
Keuffel & Esser Company
Hoboken, New Jersey

GEORGE B. PEGRAM
Columbia University
New York, New York

R. C. GIBBS
Department of Physics
Cornell University
Ithaca, New York

THE OPTICAL SOCIETY OF AMERICA was organized in 1916 "*to increase and diffuse the knowledge of optics in all its branches, pure and applied, to promote the mutual interests of investigators of optical problems, of designers, manufacturers and users of optical instruments and apparatus of all kinds and to encourage cooperation among them.*" It aims to serve the interests of all who are engaged in any branch of optics from fundamental research to the manufacture of optical goods.

MEMBERSHIP

Regular Members: "Any person who has contributed materially to the advancement of optics is eligible for regular membership."

Associate Members: "Any person who is interested in optics is eligible for associate membership."

Corporate Members: "Any corporation desirous of encouraging the work of the Society is eligible for corporation membership."

The Society cordially invites to membership all who are interested in any branch of optics, either in research, in instruction, in optical or illuminating engineering, in the manufacture and distribution of optical goods of all kinds or in physiological and medical optics.

ANNUAL DUES

Regular members, $7.50; Associate members, $5.00; Corporate members, $50.00. These dues include subscription to the Society's official journal, the *Journal of the Optical Society of America.*

MEETINGS

The Society holds two meetings per year: An annual meeting in the autumn and a midwinter meeting jointly with the American Physical Society.

For further information concerning the Optical Society of America address the Secretary, Dr. L. B. Tuckerman, Bureau of Standards, Washington, D. C.

ROCHESTER, NEW YORK SECTION OF THE OPTICAL SOCIETY OF AMERICA

C. C. NITCHIE, *President*
H. E. SEEMANN, *Secretary*

L. A. DUBRIDGE, *Vice President*
H. G. KINGSLAKE, *Treasurer*

Councilors: E. C. FRITTS, R. KINGSLAKE, H. F. KURTZ, T. R. WILKINS, C. J. STAUD (*ex-officio*)

THE AMERICAN INSTITUTE OF PHYSICS

INCORPORATED

GOVERNING BOARD

For The American Physical Society:

KARL T. COMPTON, *Chairman*
Massachusetts Institute of Technology

GEORGE B. PEGRAM, *Secretary*
Columbia University

JOHN T. TATE
University of Minnesota

For The Optical Society of America:

E. C. CRITTENDEN
Bureau of Standards

PAUL D. FOOTE
The Gulf Companies

F. K. RICHTMYER
Cornell University

For The Acoustical Society of America:

HARVEY FLETCHER
Bell Telephone Laboratories

VERN O. KNUDSEN
University of California at Los Angeles

WALLACE WATERFALL
The Celotex Corporation

For The Society of Rheology:

E. C. BINGHAM
Lafayette College

A. STUART HUNTER
du Pont Rayon Company

S. E. SHEPPARD
Eastman Kodak Company

For The American Association of Physics Teachers:

HOMER L. DODGE
University of Oklahoma

PAUL E. KLOPSTEG
Central Scientific Company

FREDERIC PALMER
Haverford College

ADMINISTRATIVE STAFF

HENRY A. BARTON, *Director* JOHN T. TATE, *Adviser on Publications*

MADELINE M. MITCHELL, *Editorial Secretary*

Office: 11 East 38th Street, New York, New York

The American Institute of Physics is a membership corporation of which five societies are the founding members. These five societies are the principal national societies devoted to pure and applied physics in America. Their names, and those of their representatives who form the Governing Board of the Institute, are given above. The principal work of the Institute is the publication of journals sponsored by the societies or by itself. The names and the editors of the journals are also listed above.

The broad purpose of the Institute is to represent, in all matters of wide or common interest, the five thousand or more members and subscribers associated with the Founder Societies and the journals. It aims to advance the science and profession of physics, and to promote cooperation between pure research, the applied sciences and the industries. To achieve these aims, it is greatly in need of an endowment and is empowered by law to administer grants and funds of any kind.

CONTENTS—VOLUME 25

JANUARY, 1935

Notes on Resistances of Selenium Cells Deposited in Certain Gases . . . LYNN W. JONES 1
Effect of Temperature upon Reciprocity Law Failure in Photographic Exposure . J. H. WEBB 4
Maxwell Triangle Yielding Uniform Chromaticity Scales . . . . . DEANE B. JUDD 24
Photometry and Energy Distribution of the High Intensity Mercury Lamp . L. B. JOHNSON 36
Study, by Means of Huygen's Principle, of the Reflection of a Spherical Light Wave from a Moving Plane Mirror . . . . . NADIASHDA GALLI-SHOHAT 39
Proceedings of the Nineteenth Annual Meeting of the Optical Society of America, Washington, D. C., October 18–20, 1934 42

FEBRUARY, 1935

Errors in Reflectometry . . . . . A. H. TAYLOR 51
Luminescence of Thorium Oxide Activated by Rare Earths. Optimum Concentration for Different Sources of Excitation . . . FRANCES G. WICK AND CHARLOTTE G. THROOP 57
Resolution Threshold of the Continuously Open Eye . . . . . SIDNEY M. NEWHALL 63

MARCH, 1935

Transmission of Ultraviolet Radiation Through Chinese Window Papers . . . . . CH'EN SHANG-YI, MENG CHAO-YING AND WILLIAM BAND 67
Influence of Present Trends in Research on the Design of Astronomical Telescopes and Accessories . . . . . G. W. MOFFITT 71
Photographic Plates for Use in Spectroscopy and Astronomy. IV. . . . C. E. KENNETH MEES 80
Penetration of the Red, Green and Violet Components of Daylight into Atlantic Waters . . . . . R. H. OSTER AND G. L. CLARKE 84

APRIL, 1935

Directory Number

The Optical Society of America Incorporated 93
Purpose and Scope of the Society 93
Scope of Optics 93
Historical Note 94
Activities of the Optical Society 95
Medals and Awards 95
The Frederic Ives medal 95
The Adolph Lomb memorial 96
Organization 96
By-Laws 96
Officers and Directors 101
Journal of the Optical Society 101
Committees 102
Representatives and Delegates to Other Organizations 102
Past Officers 103
Meetings 106

Geographical Directory of Members 120
Members in the United States according to states and towns 120
Foreign members according to country 124

MAY, 1935

Attenuation of Light in the Lower Atmosphere . . . . . E. O. HULBURT 125
Filter for Obtaining Light at Wavelength 560 mμ . . . . . KASSON S. GIBSON 131
Coordinated System of Optical Filters for Color-Temperature Determinations . FRANK BENFORD 136
New Yerkes Auto-Collimating Spectrograph as Used on the Perkins 69-Inch Reflecting Telescope . . . . . G. W. MOFFITT 142
Astronomical Seeing . . . . . J. A. ANDERSON 152
Modern Large Telescope Design . . . . . F. G. PEASE 156
Contrast Microphotometer . . . . . FRANCIS W. SEARS 162
Note on the Names of Photoelectric Devices . . . . . CLAYTON H. SHARP 165

JUNE, 1935

Spectral Distribution of Radiation from Three Reflector Units . . . . . B. T. BARNES 167
Automatic Measurement, Reduction and Recording of Wavelengths from Spectrograms . . . . . GEORGE R. HARRISON 169
On the Nature of Unpolarized Light . . . . . RAYMOND T. BIRGE 179
Comments on the Paper by R. T. Birge "On the Nature of Unpolarized Light" . . . . . L. A. DUBRIDGE 182
Cadmium Magnesium Alloy Photo-Tubes . . . . . L. R. KOLLER AND A. H. TAYLOR 184
Optical Device to Aid in Mapping from Photographs . . . . . O. M. MILLER 185
Thermoelectric Photometer of the Amherst College Observatory . . . WARREN K. GREEN 190
Heliostat for the Physics Laboratory . . . . . ARTHUR ADEL 195
Journal of the Optical Society of America: Statement of Operations for the Year Ending December 31, 1934 196
Proceedings of the New York Meeting of the Optical Society of America, February 22–23, 1935 197
Minutes of the Fifth Meeting of the Directors of the Optical Society of America, Incorporated, February 21, 1935 197
Abstracts of the New York Meeting and Author Index 199

JULY, 1935

Quantum Efficiency of Certain Light Sensitive Devices . . . . . C. C. HEIN 203
Optical Properties of Magnesium Oxide . . . . . JOHN STRONG AND R. T. BRICE 207
Interpretation of Data Obtained with Spectrophotometers of the Polarizing Type . . . . . ROBERT D. NUTTING 211
Fatigue of the Extrinsic Ocular Muscles While Reading Under Sodium and Tungsten Light . . . . . M. LUCKIESH AND FRANK K. MOSS 216
Recording Goniophotometer . . . . . JOHN M. SLATER 218
Back Numbers of J. O. S. A. Wanted 223
Annual Report of Secretary O. S. A. for 1934 224
Annual Report of Treasurer O. S. A. for 1934 226

AUGUST, 1935

Blackening of Photographic Plates by Long Wavelength X-Rays . . . F. R. HIRSH, JR. 229
Light Absorption in the Atmosphere and Its Photochemistry . . . . OLIVER R. WULF 231
Visibility of Signals Through Fog . . . . . GJON MILI 237
Prism Spectrographs with Prism Mountings Automatically Adjusted to Minimum Deviation . . . . . HARVEY E. WHITE 241
New Microdensitometer Based on That of Hartmann . S. JACOBSOHN AND W. H. KLIEVER 244
Fading of the Latent Photographic Image on Standing . . . . . MALCOLM C. HYLAN AND JULIAN M. BLAIR 246
Theory of the Maximum Visual Efficiency of Colored Materials . . DAVID L. MACADAM 249
Disk Colorimetry; Including a Comparison of Methods for Computing Tristimulus Values for Certain Disks . . . . . DOROTHY NICKERSON 253

SEPTEMBER, 1935

Light Absorption and Distribution of Atmospheric Ozone . . . RUDOLF W. LADENBURG 259
Some Phases of the Mitogenetic Ray Phenomenon . . . . . ALEXANDER HOLLAENDER AND WALTER D. CLAUS 270
Experimental Determination of the Visual Thresholds at Low Values of Illumination . . . . . J. PRESTON CONNER AND ROBERT E. GANOUNG 287
On the Fundamental Optical Invariant, the Optical Tetrality Principle, and on the New Development of Gaussian Optics Based on This Law . . . . . M. HERZBERGER 295
New Recording Spectrophotometer . . . . . ARTHUR C. HARDY 305
Some Stigmatic Grating Mountings . . . . . HAROLD T. SMYTH 312
Modification of the Fabry-Perot Interferometer . R. C. MACHLER AND RUSSELL A. FISHER 315

OCTOBER, 1935

Radiation and Absorption of Energy by Tungsten Filaments at Low Temperatures . . . . . IRVING LANGMUIR AND J. BRADSHAW TAYLOR 321
Photo-Electromotive Forces and Currents in Single Crystals of Selenium . R. M. HOLMES 326
Back Numbers Wanted 329
Optimum Grain Size in the Christiansen Filter . H. S. DENMARK AND WILLOUGHBY M. CADY 330
Integrating Factor of the Photometric Sphere . . . . . FRANK BENFORD 332
Simplified Computation of Cartesian Lens Surfaces . . . . . LUDWIK SILBERSTEIN 340
Photoelectric Colorimeter with Logarithmic Response . . . . . RALPH H. MÜLLER AND GILBERT F. KINNEY 342
Apparatus for Darkfield Photometry and Densitometry . P. S. WILLIAMS AND GORDON H. SCOTT 347

NOVEMBER, 1935

Dispersion of CS_2 and CCl_4 in the Infrared . . . . . A. H. PFUND 351
Absorption Tube for the Investigation of Gases in the Photographic Infrared . . . . . RICHARD M. BADGER, LYMAN G. BONNER AND PAUL C. CROSS 355
Polarization-Interference Phenomena in Quartz Spectrographs . . . . . JOSEPH W. ELLIS AND JOSEPH KAPLAN 357
Maximum Visual Efficiency of Colored Materials . . . . . DAVID L. MACADAM 361
Luminescence of Frozen Solutions of Certain Dyes . . . . . FRANCES G. WICK AND CHARLOTTE G. THROOP 368
Simple Stroboscope . . . . . AUSTIN J. O'LEARY 375

DECEMBER, 1935

Editorial . . . . . EDITOR 381
Concerning Interrupted Photographic Exposure . . . . . CARLETON C. LONG, F. E. E. GERMANN AND JULIAN M. BLAIR 382
Seasonal Changes in Components of Submarine Daylight . . . . . E. ALLEN WILLIAMS AND C. L. UTTERBACK 384
Visibility Photometers for Measuring Atmospheric Transparency . . . GEORGE M. BYRAM 388
Photoelectric Method of Measuring the Transparency of the Lower Atmosphere . . . . . GEORGE M. BYRAM 393
Minimum Useful Gradient as a Criterion of Photographic Speed . . . . . LOYD A. JONES AND M. E. RUSSELL 396
Sodium Alloy Lamps . . . . . GORTON R. FONDA 412
Eastman Transmission and Reflection Densitometer . C. A. MORRISON AND J. W. MCFARLANE 417
